

DIVERLESS SHIPSIDE VALVE SERVICES

SEACHEST BLANKING

SAFE - Proven method that eliminates diving requirement and minimises isolations.

SECURE - Positive hydraulic locking forces in addition to hydrostatic head.

EFFICIENT - FPSO/MODU base using a 2 man team.

FLEXIBLE - Utilise existing blanks and short lead time.

ADAPTABLE - Field configurable, flexible deployment options.

CONVIENENT - Minimal operational impact, can be combined with other services.

INSPECTION AND CLEANING

CLEAN - Using high pressure water or mechanical brushes.

INSPECT- HD Video, Stills, ROV deployed endoscope.

MEASURE - 3D Scan, Calipers, DTM, 3D party sensors.

FLEXIBLE - Hull Crawler option, excellent weather tolerance.

OVERBOARD PLUGGING

SAFE - Proven Method that eliminates diving requirement and minimises isolations.

SECURE - Double Isolation.

EFFICIENT - FPSO/MODU based using a 2 man team.

FLEXIBLE - Short lead time, excellent weather tolerance.

ADAPTABLE - Field configurable, flexible deployment options, short seal length.

CONVENIENT - Minimal operational impact, can be combined with other services.

OUR COMPANY

Intervention Engineering has been providing a range of FPSO based ROV services and solutions.

Since 2006 - Mooring and Riser Inspections and Ballast, Crude and Condensate Tank Inspections.

Since 2007 - Ballast Tank Inspections for Class and UWILDS.

Since 2016 - 100% Diverless UWILD of Self Propelled Vessels and Valve Plugging.

Since 2017 - Prop Cleaning.

Since 2018 - Seachest Blank Installation.
