

Intervention ENGINEERING

www.intervention.com.au

Intervention Engineering specialise in small ROV operations. Established in 2001 as a subsea engineering consultancy we became an ROV operator in 2006. From our base in Perth, IE operates 12 inspection class ROVs. As a team of engineers we embrace technology in seeking the best solution for our clients. In all our operations we operate with the greatest efficiency, from the lowest possible footprint.

ROV SERVICES

- FPSO Support
- Platform Support
- Environmental Inspections and Monitoring
- Full Field Inspections
- Tank Inspections
- Shallow Water Inspection Services
- 3D Photogrammetry and Modelling

if you don't have a back up, you don't have a plan
